

METALLURGISTS / RESEARCH ENGINEERS

Outotec provides leading technologies and services for the Sustainable use of Earth's natural resources. As the global leader in minerals and metals processing technology, we have developed many breakthrough technologies over the decades for our customers in metals and mining industry. We also provide innovative solutions for industrial water treatment, the utilization of alternative energy sources and the chemical industry. Outotec shares are listed on NASDAQ OMX Helsinki. www.outotec.com

At Outotec we are passionate about building innovative and sustainable solutions that fulfill world's growing need for natural resources. We are continuously entering new markets and businesses, which creates interesting opportunities for personal and professional growth in our multinational work environment.

Are you a freshly graduate Master of Science or Ph.D. in one of the following:

- Minerals Processing
- Hydrometallurgy
- Pyrometallurgy
- Materials Engineering
- Electrochemistry

who are eager to learn and deepen your knowledge to become an established expert?

We are now looking for five metallurgists/research engineers to participate in our competence development program. The position is permanent and you will be located in Outotec Research Center in Pori

As Metallurgists / Research Engineers, you will:

- Participate in approximately 2 years competence development program to get your journey started towards an acknowledged expert in Outotec
- Develop a deep knowledge in one area of expertise and gain understanding of related technologies
- Participate in R&D tasks i.e. experimental testing with laboratory staff, scientific projects and reporting
- Provide technology support to sales
- Perform process modeling and simulation
- Gain experience from customer site work or participate in commissioning
- Be part of an expert team or cross functional team giving you the required support

To succeed, you will need:

- Master's or Ph.D. degree in above mentioned or related fields
- Open mind and proactive attitude
- Eagerness to learn and challenge yourself
- Good interpersonal skills
- Good communication skills in English, both written and oral
- Creative problem solving and analytical thinking skills
- Ability to manage multiple assignments, priorities, and deadlines

We offer you an opportunity to work in an international environment and be surrounded by world-class experts who can support your development. You will also gain experience from customer site work and apply your knowledge into a practice. In the long run we have different career opportunities and paths within the organization.
